

# OASIS® WATERLESS BATHING

Proven to physically remove over 99% of contamination without the use of harsh disinfectants, whilst moisturising and protecting the skin.<sup>1</sup>

# OASIS®

Using purely the mechanical action of wiping, the large heavyweight cloths help reduce the transmission risk of potentially harmful pathogens by physically removing them from the skin.

### Why Choose Oasis?

Oasis® ‘water free’ bathing solutions are a convenient and effective pre-impregnated cleansing solution, helping to eliminate the issues associated with soap and water, whilst delivering a more efficient bathing process.

#### Proven to Reduce Skin Bacteria

Oasis is proven to reduce skin bacteria more significantly than alternative bathing methods, ideal for protecting those at greater risk.<sup>2</sup>

#### Reduced Risk of Transmission

The washcloths are intended to be used individually, with one single-use cloth per anatomical region, helping to minimise the risk of cross-contamination.

#### Reduced Bathing and Contact Time

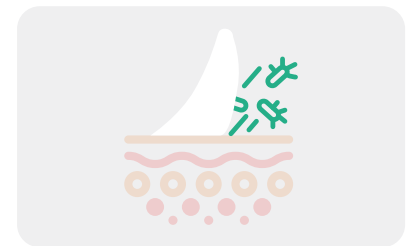

Proven to save 21 hours of nursing time per week, minimising contact between patient and caregiver and reducing the risk of transmission.<sup>3</sup>

#### Safe & Hygienic Disposal

Unique macerator-friendly products eliminate the risk of costly drain blockages and waste exposure time as separation of contents into clinical waste does not need to take place.

#### Supports Independent Bathing

Provides patients with confidence to cleanse without assistance, eliminating manual repositioning by caregivers and subsequent risk of transmission.

| Description                             | Size      | Pack Qty | Carton Qty | Code    |
|-----------------------------------------|-----------|----------|------------|---------|
