

Sharps Terminator®

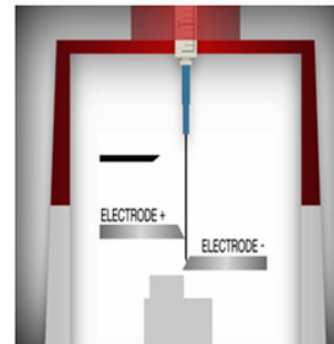

FDA approved device which safely & immediately destroys hypodermic needles post-usage

Features

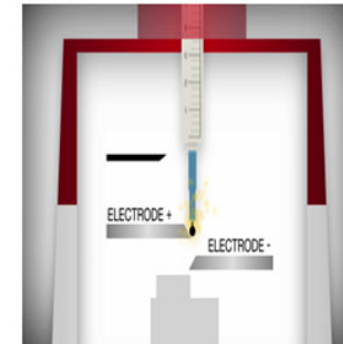

- Portable & single handed procedure
- UV Light technology
- Incinerates needle 980 – 1100 C
- Clinically proven no pathogens
- No airborne disease

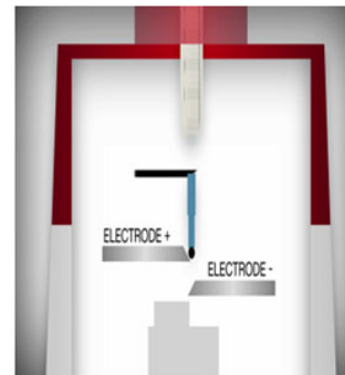

How It Works

Contact with electrodes

Burning needle

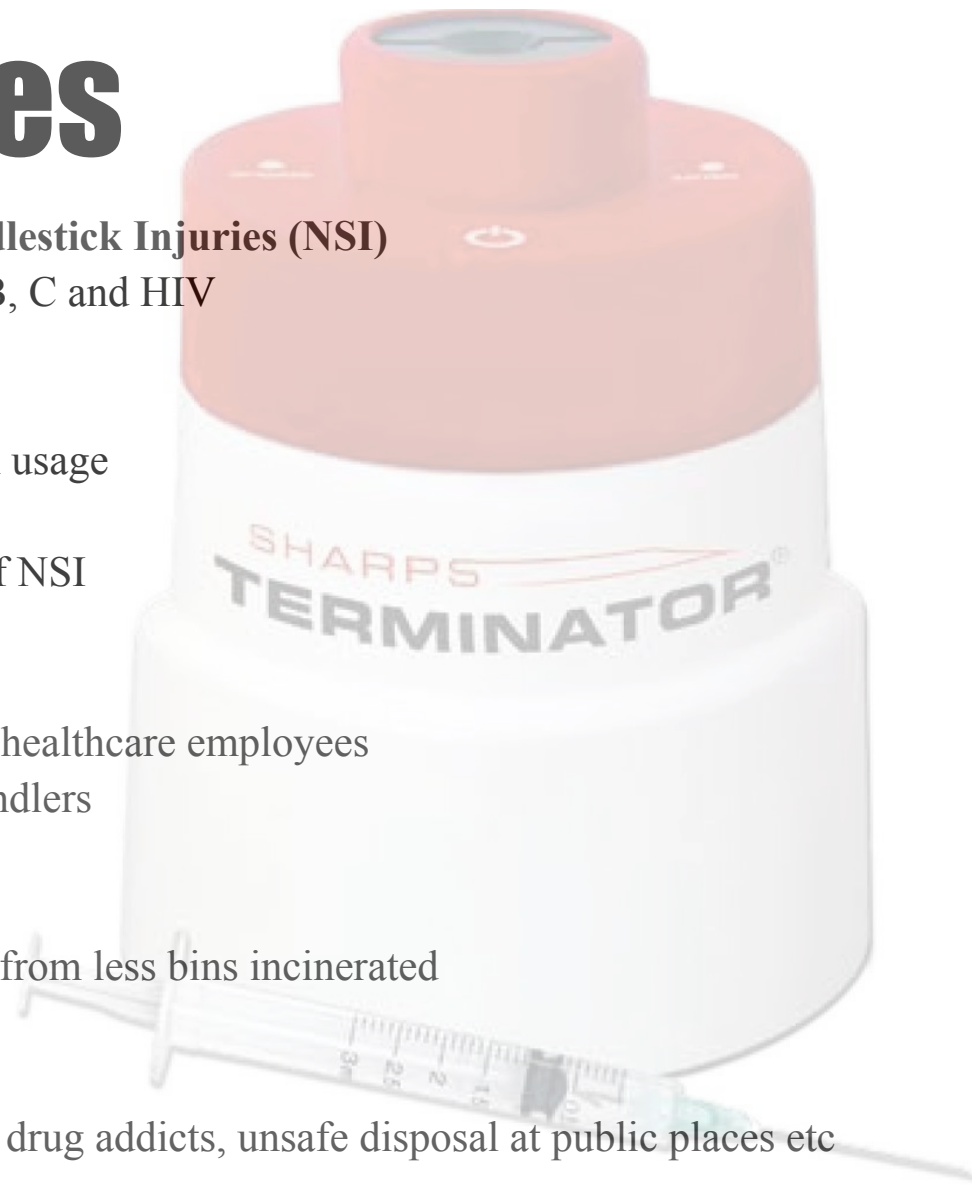

Cutting plastic

UV light exposure

Advantages

- **Best Protection against Needlestick Injuries (NSI)**
 - stops the spread of hepatitis B, C and HIV
- **Big Cost Savings**
 - lower frequency on sharps bin usage
 - lower incineration cost
 - zero cost of treating victims of NSI
- **Great Workplace safety**
 - increase safety compliance of healthcare employees
 - reduce risks of sharps bins handlers
- **Save the Environment**
 - less bins usage; less pollution from less bins incinerated
- **Social Responsibility**
 - eliminates syringe sharing by drug addicts, unsafe disposal at public places etc

Summary

- **TRIPLE WIN** – Safety. Savings. Ecology
- **PREVENTION** – Needlestick injuries & infections
- **SAVINGS** – less usage, less incineration
